

Product: Body Lifter, hydraulic, electrically height adjustable
Cat.-No.: MA-1270

Body-Lifter, scissor typewith electrical height adjustment

Type: 1270.1

Description

Sturdy body lifter with electrical height adjustment. For body lifting at body fridges, body deep freezers, coffin lifting / placement into racks and the automatic loading / unloading of the cold rooms for body storage.

One-man operation. Especially developed for the lifting of the bodies into the compartments of the body fridges. Incl. 2 x U-shaped transfer rails for accommodation of a transfer body tray with 8 small wheels and fixation mechanism of tray. U-shaped rail with docking guide for body fridges. Solid construction with scissor type mechanics and special frame construction for highest loading. Max. load: 400kg.

Features

4 easy turning wheels with bearing will assure best and easy operation / maneuverability. 2 wheels have a foot break system. Wheels in trackless rim construction for use in hospitals (no black rubber stains). Detachable push handle fastened at lower frame. Handle height appr. 950mm. Plastic wall bumpers at front. Power independent operation due to low voltage battery operation. Height adjustment per foot switch. Rechargeable battery with visual battery loading display and acoustic alarm at "low battery situation". Complete coverage of the lifting mechanism and battery unit. Complete transporter in "IP 54" splash water protected design.

For coffin lifting the MA-1270 is using a special coffin plate with wheels
