

Product Specification / Data Sheet

Product: Veterinary large animal autopsy table, mobile

Article: MA-2038

Veterinary large animal autopsy table, mobile

use in veterinary pathology, zoology and museum preparation technology for transport, production and the section of large animals

Description

Heavy version made entirely of stainless steel EN/DIN 1.4301. (optional 1.4571). Maximum load capacity: 1500kg with 4 electrically controlled lifting columns. Without lifting columns, the load capacity increases, please contact us if necessary. Mobile version with lockable heavy-duty wheels. For example in veterinary pathology / food monitoring and museum preparation.

The upper part is designed for large animals. The work surface is positively (convex) and has at one end 2 drains with 100mm diameter and 2 removable residual sieves. The drain pipes end in a drain pipe about 300mm above the ground. (Alternatively stainless steel bucket) The saturated work surface is lined with noise. For safe transport, there are 6 removable fixing rods with fastening eyelets (3 on each longitudinal side).

The lower area contains: 4 heavy load lifting columns (splash-protected) for a vibration-free height adjustment of 300mm via splash-proof switches "AUF" and "AB". In order to guarantee the exact synchronization of the 4 drives, the special design of the drive control is part of the lifting column. This means that the lifting columns run immer synchronized in both directions – even under different loads. Power supply via Schuko plug with approx. 4m cable, desired lengths are possible.

Technical data

- Material: Stainless steel EN/DIN 1.4301 K320 Duplex Cut
Weight: approx. 450kg
Max load capacity: 1,500kg
Dimensions: 2000mm(L) x 1000mm(W) x 800-1100mm (H=without fixing rods)mm
Length fixing rods: 700mm
-electrical operation via synchronous control (protection class IP66)
-Work surface convex with 2 drains DN 100 incl. 2 removable drains, sound-insulating lined
-Hand button
-Interface unit for setting the speed and shutdown
-Comfortable lifting and lowering for ergonomic work

Product Specification / Data Sheet

Product: Veterinary large animal autopsy table, mobile

Article: MA-2038

- Lowering via 4 electronic lifting columns(Protection solution IPX1) lifting force 4300N
- H2O2 Fumigation
- disinfectable
- 4 wheels, steerable and detectable diameter 200mm
- electric power supply by battery incl. charger.
